1. Reference (a) established the NAVSEA PCB Advisory system for the promulgation of information required to implement the Compliance Agreement between the Navy and the U.S. Environmental Protection Agency regarding management of PCBs in Navy vessels and craft on the Naval Vessel Register. Although the Agreement is not yet final, Advisories are being issued to implement the requirements of reference (b) which will not be altered by the Agreement.

2. Forwarded as enclosure (1) is revision A to the first PCB Advisory. The Advisory has been revised to limit the applicability to Navy activities, ashore and afloat, performing maintenance on Navy vessels and craft instead of both Navy and contractor activities and has been revised to delete all guidance for contractors performing work on Navy Vessels and craft. The Distribution has been revised to include all activities identified as users of vessels and craft in the Naval Vessel register and all activities involved in repair or maintenance of Navy vessels and craft.
